

DANIEL LANDAU'S TIME-BODY STUDY

MONDAY, 1/23, 2-3:30
LOVE LIBRARY 430

Time-Body Study is a performative experiment created by media artist and researcher **Daniel Landau** exploring the boundaries of body, identity, and self using virtual reality technology. This live event includes a lecture and demonstration of an experiment where a participant, wearing a virtual reality head-mounted display (HMD) is re-embodied in the body of a 7, 40, and 80 year old person.
